

## Protect Your Landscape

Deer thrive in places where different types of vegetation meet. These places are known as “edge habitats”. Suburban landscapes are perfect “edge habitats” and offer a wide variety of healthy, well-watered plant material for deer to feast upon.

*Adams* believes that the most efficient and humane way to deter deer from grazing in your gardens is to plant varieties which do not appeal to deer in the first place. *Adams*' list will help you protect what you invest in your landscape by choosing trees, shrubs and flowers that will not attract hungry deer.

### Plants That Are Rarely Eaten by Deer

#### TREES

- European larch
- Fir
- Hawthorn
- Maidenhair tree
- Magnolia
- Pine
- Red bud
- Spruce

#### SHRUBS

- Barberry
- Boxwood
- Cotoneaster
- Holly
- Juniper
- Lilac
- Pine
- Smoke Tree
- Spruce
- Viburnum
- Wisteria
- Yucca

#### ANNUALS

- Alyssum
- Cleome
- Dusty Miller
- Lobelia
- Marigolds
- Morning Glory
- Nasturtium
- Potato Vine
- Snapdragon
- Verbena

#### BULBS

- Allium
- Daffodil
- Freesia
- Grape Hyacinths
- Scilla
- Snowdrops
- Siberian Squill

#### PERENNIALS

- Astilbe
- Aster
- Blanket Flower
- Bergenia
- Butterfly Bush
